

# Ancient Egyptian Dentists

Not everyone enjoys a visit to the dentist but imagine you lived 3000-5000 years ago during the age of the ancient Egyptians. Treating toothache was handled slightly differently than it is today...

## Dentist! Dentist!

Here's what an Ancient Egyptian dentist might say:

**"Toothache?** Let's have a look... Ah yes, you've got mouth worms."

**"What? Never heard of mouth worms?** They're the cause of all tooth decay!"

**"Need something to take the pain away?** Dangle a dead mouse on your tooth. That should do the trick!"

**"Still aches?** Hmm... well, try praying to the Gods, and if that doesn't work stop being naughty because that's probably what's caused the problem in the first place!"

## Dental Hygiene

**Toothpaste** – this could be a mixture of egg shells and horses' hooves, or sometimes a delicate blend of crushed rocks, mint, salt, pepper and dried iris flowers!

**Mouthwash** – bran and celery.

**Antiseptic paste** – incense and onion.

**Pain relief** – opium (an illegal drug today!).

## Main Problems

- Poor diet! Egyptians didn't eat enough vitamins and minerals to keep their teeth and gums healthy!
- Gritty bread! A lot of sand and grit found their way into Egyptian food – especially bread. This wore down the enamel in people's teeth.
- No money! Lots of people couldn't afford to see a dentist so their teeth simply fell out!

1. According to the ancient Egyptians, what do mouth worms cause?

---

---

2. Imagine you were an ancient Egyptian dentist. Using the text, what two things could you suggest if someone had toothache?

---

---

3. Look at the ingredients for toothpaste. Why might some of these ingredients be bad for keeping your teeth and gums healthy?

---

---

4. Look at the main problems section. Pretend you are Pharaoh and come up with one way to improve the health of people's teeth:
