

# Still Life – Final Piece

# Create your Composition

- Select 2 or 3 different objects e.g. an apple, a bottle and a mug. Choose shapes that you think you'll be able to draw
- Arrange them together in a group so that they make an interesting composition – think about the height of the objects, are they going to overlap or sit separately?

# Shapes

Look at the size and shapes of your objects carefully – how can you break them down into simple shapes?

E.g. squares, rectangles, circles

If you want more practise of drawing shapes - watch this video of how to draw a teddy bear.

# Get Drawing!

Make a careful drawing of your objects on A4 paper – remember to sketch lightly initially.

Have a look at the observational drawing sheet for some tips on building up your drawing.

Don't forget to add shade and tone to your drawing – you could look back at the videos from other weeks to support you.
