

Investigating Inheritance and Variation

Investigate the characteristics you have inherited from your parents by closely examining their photographs and your own. Write down what you think you have inherited from that parent.

The diagram illustrates the flow of inheritance from two parents to one child. At the top, there are two large, empty rectangular boxes with rounded corners, representing the parents. These boxes are connected by a horizontal line. From the center of this line, a vertical arrow points down to a single, larger empty rectangular box with rounded corners at the bottom, representing the child.

Inherited:

Inherited:

A large, empty rectangular box with rounded corners, intended for the child to write down their own characteristics. It is positioned centrally below the parent boxes and above the child's list of inherited traits.
