<https://explorify.wellcome.ac.uk/blog/explorify-at-home-plants>

Use this link to explore Plants. There are activities for all age groups here so select the one for ages 7-9.

Now try these questions:

Whereabouts in your home would be a good place for a plant to grow? Why? Where would be a bad place for a plant to grow? If you have any left over carrot tops or apple pips, you could try growing them in different places and find out!

Try the Walking Water investigation on our Home Learning Page
